Part II　Reading Comprehension

Passage 1

In our life, we may meet people with different personalities. People with different personalities will do things in different ways, and some people may find these differences interesting. What is your personality type? Read about the following introduction and find

out.

The first type is called a Dreamer. A Dreamer thinks there is a “right” way to do everything. This person wants to live in a “perfect world”. Many are good listeners and like to help others. Many work as teachers, and often lead others. Famous Dreamers include Mohandas Gandhi, Angelina Jolie.

Secondly, a Partner wants to be in a group. For this kind of people, rules are important. They consider traditions to be of great value. Partners are often serious, careful people. Many do well as teachers, managers and police officers. Some famous partners include Queen Elizabeth II, Mother Teresa.

For Thinkers, understanding things is very important. They like to deal with problems and make new things. Thinkers can also be active. They like to win. They have very strong opinions. Many thinkers work as scientists, inventors and engineers. There are some famous thinkers such as Bill Gates, Stephen Hawking.

Lastly, artists want to be free. They don’t want to follow the rules all the time. They also like trying new things. Like Thinkers, many Artists have strong opinions. They are creative and do well as musicians and actors. Famous Artists: Cristiano Ronaldo, Madonna.

These are some typical personalities. Understanding the similarities and differences between people can be very interesting and inspiring. We are born to be different; the only thing we can do is to respect each other and learn from each other.

16. How many personality types are mentioned in the passage?

_____

17. Who may give you a hand when you need help according to the passage?

_____

18. If you are active and like to win, what kind of job is the best choice?

_____

19. Do Bill Gates and Stephen Hawking have the same personality in some ways?

_____

20. What is a Partner like?

_____

Passage 2

It’s common for us to take a train. But have you ever thought of having a special place to

study on the train? This will surely be a very unusual experience.

The train No. 5609/5610, which runs between Chongqing and Xiushan, is a slow train. In some carriages (车厢), there are no hard seats (硬座) but some desks and chairs next to the windows. They became bright "study carriages" for passengers in need.

Some other slow trains also have their own bright "study carriages", including No. 5619/5620 and No. 5633/5634. Many students from nearby schools often take the trains between school and home at weekends. The trains are their "school buses" and many of them use the travel time to finish their homework.

On the train No. Z150, which runs between Guiyang and Beijing, a "book bar" carriage has been welcomed by college students. There are nearly 400 universities and colleges in the cities along the rail line, making No. Z150 the first choice for most students. Since 2015, the train's dining car has been open at night to provide students with a lending library and some tea. There students enjoy reading books and drinking tea for free. They even start discussions on some topics in groups.

These small measures were made to provide a comfortable environment for learners to continue their studies. And they are well welcomed by many passengers. Many students say it's meaningful to set up such carriages and they'd like to share them with their friends.

21. What do "study carriages" on the train No.5609/5610 look like?

_____

22. Does only the train No.5609/5610 have "study carriages"?

_____

23. Which train has a "book bar" carriage?

_____

24. What can students do on the train No. Z150 besides starting discussions on some topics in groups?

_____

25. What do you think of setting up "study carriages"?

_____

Passage 3

Do you ever find yourself standing in front of rubbish bins, not sure whether the piece of waste in your hand is recyclable or not? To solve this problem, four Hong Kong students have

invented a smart rubbish bin that uses AI to divide the waste. The students called the bin Waste Collection Point.

The bin uses a camera to know the kind of the waste and divides it into plastic, paper, glass or other kinds. To make sure the bin can divide waste correctly, the team tested every product in the school shop and took over 500 pictures of each one. “To train the AI, we had to take many photos from different angles, so it has a better rate of accuracy (精确度),” said one of the students.

The students had the idea of the smart bin two years ago because they saw a lot of rubbish here and there in their village. Every weekend, they had to join the villagers in picking up the waste.

The students decided to invent a special recycling bin that would encourage people to protect the environment. Although the school ended at 2 p.m., the team members would continue to work on their invention until 6 or 7 p.m. at school.

“Our bin is now in its third generation (代). Before graduation, we hope that it can be widely used in the city.” The students said, “Then it will be easier than ever for people to recycle waste and protect our environment.”

26. What’s the name of the smart rubbish bin?

_____

27. How can the smart rubbish bin know the kind of the waste?

_____

28. What made the four students have the idea of the smart rubbish bin?

_____

29. Where did the four students work on their invention?

_____

30. Is the smart rubbish bin in its third generation?

_____

Passage 4

It was a cold January morning. A man sat at a subway station in Washington DC and started to play the violin. When the musician played, thousands of people went through the station, but most of them didn’t stop.

A few minutes went by and a middle-aged man noticed there was a musician playing

music. He slowed down and stopped for a few seconds and then he walked away hurriedly. Four minutes after he played the violin, the violinist received his first tip. A woman threw the money in the violin case without stopping and continued to walk.

In the musician's 45-minute performance, only 6 people stopped and stayed for a while. About 20 gave him money but continued to walk. He collected $32 in all. When he finished playing and silence took over, no one noticed it.

No one knew the violinist was Joshua Bell, one of the best musicians in the world. Two days before his playing at the subway station, the tickets for Joshua Bell's performance were sold out at a theater in Boston and the seats each cost 100 dollars.

Joshua Bell's playing in the subway station was a social experiment. It asks questions: in a common environment at a wrong hour, do we enjoy beauty? Do we stop to make a response? If we do not have a moment to stop and listen to one of the best musicians in the world playing the best music, how many things are we missing? So don't miss the wonderful moment in life!

31. What was the weather like that day?

_____

32. When did the musician get his first tip?

_____

33. How long did the musician play?

_____

34. How many people recognized (认出) the musician at the subway station?

_____

35. What does the writer suggest?

_____

Passage 5

Why should students play sports? There are some common reasons. Some people think that students play sports in order to get exercise. Others think it can help students have fun. But that is not enough. If students play sports, they can get more than healthy bodies. Why? Read the following for other reasons.

Students who play sports do better in school. Some people think that doing exercise will take up students' study time. But a recent study has shown that students who play sports get

better scores in school than those who don't. Exercise gets students to learn, remember things and reflect better.

Students who play sports develop their teamwork spirits and learn problem-solving skills. When they are working together with others to win games and reach goals, they're learning how to succeed in practice. And these skills will be useful to them for their study or their future work.

Playing sports can also improve confidence. Students who play sports feel better about themselves. When they know they can improve and reach their goals by practicing, it builds their confidence. And sports can also help them have communication with others and make new friends.

Now, how about going out to play sports with your friends every day?

_____

51. Scientists believe that music influences the way people behave. They think that the sound of western classical music makes people feel richer. When a restaurant plays classical music, people spend more money on food and drinks. When the restaurant plays modern music, people spend less money. Scientists also believe that loud, fast music makes people eat faster. Some restaurants play fast music during their busy hours. This makes people eat faster and leave quickly. Restaurants can make more money in this way.
