14. However, naked marriage has become the most fashionable wedding style for those who were born after _____ 1980s.

15. He pretended to his family _____ everything was fine.

Part II　Reading Comprehension

Passage 1

China is a country with big rivers. So, there are a lot of people who live on water and build boats. Zhang Guohui has been making ships, from over 30-meter-long boats to meters-long model ones, for more than sixty years.

"Every minute, I keep thinking about making it perfect," said the expert of the watertight-bulkhead technology of Chinese junks (中国船舶水密舱壁技术). In 2010, it was included on the list of Intangible Cultural Heritage (非物质文化遗产) by UNESCO.

Zhang was born in a poor family in a fishing town. He started to make a living by fishing at 16 and at that time he became interested in making boats. Being a fast learner, Zhang was later sent to Quanzhou and Xiamen to receive training and he became a master of traditional Chinese junks.

With the development of the modern shipbuilding industry, the need for large wooden boats dropped. Zhang began making model ships using his 20 years of shipbuilding skills. He feared that the traditional skills would die someday. Luckily, he met Wang Lianmao, director of Quanzhou Maritime Museum, in 2007. After their meeting, he started to repair old ships and make model ships for the museum.

In 2016, Zhang was invited to give lessons to university students. "They are so interested in shipbuilding, and many of them even came to learn about boat making during holidays. I'm really moved. As long as I'm alive, I'll keep passing on the skills," Zhang said.

16. How long has Zhang been making ships?

_____

17. When was the watertight-bulkhead technology of Chinese junks included on the list of Intangible Cultural Heritage?

_____

18. Where did Zhang receive training about making boats?

_____

19. What did Zhang do for Quanzhou Maritime Museum?

_____

20. How did Zhang feel when students came to learn about shipbuilding from him?

_____

Passage 2

For many Chinese people, Lantern Festival, which fell on Feb.15, 2022, marks an end to two weeks of the Lunar (农历) New Year. For folk artist Wang De, it is also the busiest, best time for him to show his craft (手艺) creating molten (熔化的) iron fireworks.

Wang, who is a blackmith (铁匠) of the 500-year-old art of *dashuhua*, which means "creating tree flowers", lives in Yuxian County in the city of Zhangjiakou, North China's Hebei Province.

To create molten iron fireworks, scrap iron (铁屑) is melted to 1,600℃ and thrown against a cold wall to blinding effect.

Wang, 58, and his assistants put on over a dozen *dashuhua* shows for local people and tourists as part of the Spring Festival activities each year. The folk artist hopes the tradition can bring more visitors to his hometown of Zhangjiakou, which caught international attention.

Dashuhua is a traditional form of fireworks show that takes place during certain festivals. In ancient times, this was a show that only those people with wealth and high social positions could afford. There are only four people left in China who have mastered (掌握) the ancient practice, and three of them are not young, according to local media reports.

Because of the risk of the show, it's easy for *dashuhua* artists to get hurt when they are giving shows. And the high-risk tradition is still only kept for the brave. During a show a few years ago, Wang got serious burns on his leg and it took two months to recover.

Both Wang's father and grandfather were blacksmiths. "I learned the craft from my father. When I was young, I thought it was exciting. But years later I also felt it was my duty to pass it on to the next generation (代)," he says.

21. What does *dashuhua* mean?

_____

22. During which festival do Wang and his assistants give *dashuhua* shows every year?

_____

23. Who could afford *dashuhua* shows in ancient times?

_____

24. Are *dashuhua* shows very dangerous?

_____

25. How do you think Wang will pass his craft on to the next generation from the last paragraph?

_____

Passage 3

Rob Frenette, a Canadian boy, was often bullied (欺凌) at school. He was often lonely and scared. When he was fifteen, however, he decided to do something about his problems. He walked into a newspaper office and told them about the bullying. His story went into the newspaper and soon, all the TV stations in Canada wanted to talk to him about his experiences. They also wanted to hear his ideas about how to stop bullying.

In his free time after school, Rob helps other people with bullying problems.

With his friend Katie Neu, he set up the website *www.bullyingcanada.ca.* On the website, visitors can find advice, stories and poems about bullying, in both English and French. When people are upset, they can talk on the phone or online to Rob and his team.

Every weekend, Rob answers e-mails from people who have been bullied at school. He also speaks to children and teachers around Canada about bullying.

Rob's most important message is: "When you're bullied, there's nothing wrong with you. So, keep trusting yourself. And remember that there are people who care about your problems. You just have to find those people."

One of Rob's ideas is "Blue Day", a special day that works to stop the problem of bullying in schools. On that day, students have to wear blue clothes, and in class, they learn how to keep bullying from happening. More than 150 Canadian schools now celebrate Blue Day. Rob says he won't stop until there is Blue Day in every school in Canada.

26. Why did Rob Frenette often feel lonely and scared?

_____

27. How did Rob solve his problems at the age of fifteen?

_____

28. List two ways Rob helps other people with bullying problems.

_____

29. How many Canadian schools celebrate Blue Day now?

_____

30. What do you think of Rob Frenette? And why?

_____

Passage 4

It's hard to turn down a tasty banana. They taste good and you don't have to wash them before eating them. However, British scientists say that the fruit may disappear by 2050.

One reason for this is climate change. Scientists at the University of Exeter collected data from 27 countries and regions that produce 86 percent of the world's bananas. They found that climate change has improved growing conditions in 21 of these countries. In the past 60 years, the average yield (平均产量) has reached 1.37 tons of bananas per hectare (每公顷).

However, if temperatures keep rising, this advantage will disappear. Ten of the countries, including India, the world's biggest producer of bananas, will produce fewer bananas. By 2050, the fruit may die out.

Shouldn't bananas grow more easily if it's hotter outside? In fact, the perfect temperature for growing bananas is between 24 and 32℃. If the temperature gets too high, they will stop growing.

Diseases are another danger to bananas. Unlike other plants, the bananas we grow come from shoot cuttings (茎段) rather than seeds. This means that all banana plants have the same genotype (基因型). In other words, if a disease is able to kill one plant, it could kill them all.

One serious disease is called Panama. Caused by fungus (真菌) in the soil, it spreads easily. It has spread across South Asia, Africa, the Middle East, and Australia. If one banana plantation (种植园) suffers from the disease, it will take 30 years until it is able to grow bananas again. Scientists have yet to find a cure for this disease.

31. Why is it hard to turn down a tasty banana?

_____

32. Why may bananas disappear by 2050?

_____

33. Which country is the biggest producer of bananas in the world?

_____

34. Where does the bananas we grow come from, shoot cuttings or seeds?

35. If one banana plantation suffers Panama in 2022, which year can it grow bananas again?

Passage 5

As is known to all, exercise is good for your health. However, you need to do it in a scientific way. Otherwise, you can not only achieve the bad effect but also may hurt yourself. The following can help you exercise well.

Warm up. It is important to warm up before you exercise. You need to stretch your legs, arms, back and neck before you do any difficult activities like running.

Find good places to exercise. You do not need to spend a lot of money exercising. You can run or play sports in a park or in your school gym. You don't need to buy exercise equipment for your home. Just get your body moving!

Don't work too hard. Choose a sport that you are interested in and then your exercise will be fun instead of work. Also, you only need to exercise a few times each week. If you exercise for 30 minutes each time, you will stay healthy.

Drink enough water. It is important to drink water when you exercise. Your body needs the water for energy and for keeping cool.

Be careful! If you hurt yourself while you are exercising, rest until you feel better. Exercising when you are hurt is bad for your health.

Make exercise plans. Exercising can be difficult because it is tiring. You may sweat a lot and not feel like moving at all after exercising. Therefore, a good and effective plan is very important for you to control your speed. You can take care of your own body better in this way,

How to exercise well.	
The problem	You need to exercise in a __36__ way.
The ways of exercising well	Warm up: stretch your body before any __37__ activities. Find good places to exercise: you do not need to spend __38__ exercising. You can run or play sports in a park or in your school gym

	Don't work too hard: exercise for spending _____39_____ each time; do it a few times a week Drink enough water: drink water during your exercise Be careful: if you hurt yourself while you are exercising, rest until you _____40_____. Make exercise plans: you can take care of your own body better.

Part Ⅲ　Error Correction

41. I want to ask Martha for some advices when I see her. (　　) _____

A　　B　　C　　D

42. Mr. Wu can't go to the theatre with us. He with some foreigners are visiting our school.

A　　B　　C　　D

(　　) _____

_____

48. 女足运动员们对自己要求非常严格，所以她们取得了很大的进步。(strict)

_____

49. 穿白色丝绸衬衫的那个日本人似乎对湖北省很了解。(white silk shirt)

_____

50. 如果你方向感好，你就不容易在大城市迷路。(sense of direction)

_____

51. About 80% of people do not get enough vitamin (维生素) D every day. But this vitamin is very important for your health. Vitamin D is really important for our bones. When we are young, vitamin D builds up our bones and makes them strong. When we are older, we still need vitamin D to keep our bones strong. Our bodies keep the vitamin D in our bones and teeth. Then we lose vitamin D as we work and exercise during the day. But our bodies can't make vitamin D. So we have to get it from outside of our bodies.

_____

_____

_____

_____

_____

_____

_____

Part V　Writing

52. 一位名为 Crazy 的学生给学校的心理咨询师 Doctor May 写了一封求助信，讲述了她最近的烦恼：

1. 学习压力大，作业多，没休息时间.

2. 和好朋友因为小事儿闹矛盾，几天没说话了.

3. 身体疲惫，头疼.

4. 和父母关系不好.

假如你是 Doctor May，请你用英语给 Crazy 回一封信。要求先描述 Crazy 的烦恼，随后分析原因，最后给出建议。字数不低于 60 词。
